MIDI PERFORMANCE SERIES

MIDI/8 plus™

Intelligent Software For Use With The Passport MIDI Interface™

- Unlimited overdubbing on eight separate channels
- Select from 16 different channel assignments
- Controls one or more MIDI equipped synthesizers
- Syncs to and from tape, MIDI, and drum machines
- Sequence chaining, linking, and merging
- Punch-in/Punch-out, Single Step Playback and Fast forward/rewind to facilitate editing
- Auto-correct to 32nd note triplets
- Fully polyphonic: digitally records all controllers including velocity, pitch bend, preset changes, after-touch, and breath control
- Real time tempo control
- Over 6,000 note recording capability

MIDI/8plus is a powerful and expandable MIDI software program that will revolutionize the way you record music. With your MIDI synthesizer, drum machine, personal computer, and MIDI/8plus, you can compose, orchestrate, and arrange complete multi-track recordings. MIDI/8plus lets you take advantage of all that MIDI has to offer. An intelligent alternative to sequencer "boxes," MIDI/8plus combines studio quality recording with the power and flexibility of a personal computer.

Since every nuance of your performance is digitally recorded, you can edit and auto-correct with incredible precision. Using the beat clock and single step play back, you can punch in and punch out wherever you like, accurately editing up to 24 divisions in a single beat. And unlike overdubbing on tape, you'll have no loss of fidelity in your recording. MIDI/8plus gives you the time and freedom to get it right before you get it on tape.

Passport Designs Inc. is the first software company in the world to be entirely dedicated to the development of music software. Our commitment to providing musicians with the most advanced technology available has led to the development of our MIDI Performance, Printing, and Education Series of integrated MIDI software programs. Look for Passport programs that integrate with MIDI/8plus at fine music stores worldwide.

Requirements:
1 Apple II+, *IIe*, or Commodore 64 computer
